

EDUCATION

Bachelor of Science in Computer Science

University of California, Irvine
GPA 3.55

June 2019

TECHNICAL EXPERIENCE

Software Developer

EvGateway, Irvine, CA

October 2019 – Current

- Create and update UI prototypes for mobile application and web portals using Figma, Photoshop, and Illustrator.
- Develop a web portal from the design prototypes.
 - Implemented RESTful API using Node.js with integration to MS SQL database.
 - Build front end pages using HTML, Ejs, Javascript, and CSS. Utilized Chart.js to visualize data.

UI and Graphic Designer

Axxera Inc, Irvine, CA

October 2018 – June 2019

- Built UI prototypes for web applications using Figma Photoshop, and Illustrator.
- Created graphics for marketing purposes.

Undergraduate Researcher

UCI Donald Bren School of Information and Computer Sciences

April 2019 – August 2019

- Build and design front-end of the research product using HTML, CSS, Bootstrap and JS.
- Implement back-end logic (such as routing, handling client requests, connecting to the database) with Node.js.
- Integrate information from AWS RDS (PostgreSQL) and build user views.
- Set up server, deploy & test code to AWS.

PROJECTS

KnoCap - Voice Notes Web App, Alexa Integrated

A voice notes web application that is specifically intended to be used meetings. Allow users to capture conversation that occurred within the past 60 sec, 30 sec, or to record ongoing conversation. Users can then view the recorded clips along with transcriptions from the website. Application can be paired with Alexa to enable users to use Echo buttons to record. Collaboration project with UCI research team. Involved in developing the brand, UI, and front-end; creating quality mockups and prototypes; and understanding back-end technologies. Team of 6 project.

Node.js, Express, EJS, PostgreSQL, CSS, Bootstrap

Fabflix - Fullstack Web Development

A movie database web application. Implemented functionalities such as login, browsing, searching, sorting, and purchasing (shopping cart with checkout). Developed APIs using Java servlets and front-end with HTML, CSS, and JS. Built a separate login for Administrator that allows adding actors and movies, and viewing database metadata. Deployed code to AWS. Increased scalability with load balancing. Team of 2 project.

Apache Tomcat, MySQL, Java, Javascript, HTML, CSS, Bootstrap, AWS, Android

Personal Website - claudiamastan.github.io

HTML, CSS, Javascript

SKILLS

Technical	Proficient:	JavaScript, Node.js, SQL, HTML, CSS, Bootstrap, Adobe Creative Suites (Photoshop, InDesign, Illustrator, After Effects), Figma, GitHub.
	Familiar:	Python, Java, React, SASS, Flask, C++, C.
Language		English, Indonesian

RELEVANT COURSES

- Data Structure Implementation & Analysis (C++)
- Object Oriented Programming in Python
- Object Oriented Programing; Advanced Data Structures & Algorithms in Java
- Database Management (MySQL)
- System Design (C, Linux CLI, Vim)
- Advanced Computer Networks (Wireshark, GNS3, CLI)
- Principles of Operating Systems
- Machine Learning and Data-Mining
- Design and Analysis of Algorithms
- Computer and Network Security

ADDITIONAL EXPERIENCE

Technical & Operations Intern

TAGSI, Sunnyvale, CA

July 2016-August 2016

- Assisted with technical, operations, and marketing for child and senior citizen ride share company.
- Tested administrative console and driver/parent apps including documenting bugs and necessary future improvements, resulted in increased usability and performance of the apps and console.
- Managed driver acquisition and onboarding.
- Conducted marketing for driver recruitment and successfully attracted new driver applicants.

Marketing Assistant

UCI Center for Student Wellness and Health Promotion (CSWHP), Irvine, CA

November 2017 – September 2018

- Maintained and updated CSWHP website regularly.
- Created marketing and promotional materials for CSWHP events to increase community engagement.
- Provided support to professional staff in their marketing efforts within the UCI community.

Graphic Designer

Foothill College, Los Altos, CA

February 2016 - June 2017

- Provided designing, retouching, and printing services to students, faculties, and departments.
- Worked closely with Foothill's Marketing department to develop print and digital layouts.
- Design jobs include creating visual concepts, flyers, booklets, posters for marketing or other purposes.
- Maintained computer, printer/scanner and other hardware used in design production.
